

# northern hogsucker

## **Pumpkin carving template**

Print this. Use a sharp blade to cut all the black parts out and make a stencil. Hollow out a pumpkin, making the wall as thin as you can without going through. Tape the stencil to the pumpkin. Use a marker or tack to transfer the design to the pumpkin. Remove the paper and carve the design through the pumpkin. Simplify the fin rays and skip the words if you're not feeling patient. If you've got a huge pumpkin, blow this up as big as will fit and print on multiple sheets of paper, then tape together. The bigger you make it, the easier it will be to cut out all the thin lines. If you get famous for your carving skills, be sure to share the credit, and if you win money you can share that too. See this hogsucker on a pumpkin at <http://moxostoma.com/hogsucker-halloween/>
